Job title: Research Associate/Fellow

Job family and level: Research & Teaching Level 4
( Appointment will be Level 4 Career training grade where an appointment is made before PhD has been completed)

School/Department: Mathematical Sciences

Location: University Park Campus

Purpose of role:

- Have specific responsibility for research, for developing research objectives and proposals with Dr Bindi S Brook on the Wellcome Trust-funded Collaborative Award entitled “Integrative Transport Phenomena in Chemokine Gradient Establishment”.
- Plan and conduct work using approaches or methodologies and techniques appropriate to the type of research.
- Be responsible for writing up their work for publication and have the opportunity to use their initiative and creativity to identify areas for research, develop research methods and extend their research portfolio.

Main responsibilities:

(Primary accountabilities and responsibilities expected to fulfil the role)

| **Skills** | ▪ Excellent oral and written communication skills, including the ability to communicate with clarity on complex information.  
▪ High analytical ability to analyse and illuminate data, interpret reports, evaluate and criticise texts and bring new insights.  
▪ Ability to creatively apply relevant research approaches, models, techniques and methods.  
▪ Ability to assess and organise resource requirements and deploy effectively.  
▪ Ability to build relationships and collaborate with others, both internally and externally. | ▪ Ability to foster a research culture and commitment to learn in others. |
| **Knowledge and experience** | ▪ Expert knowledge in more than one of:  
  o advection-reaction-diffusion PDEs (e.g. Keller-Segel systems);  
  o multiphase modelling;  
  o individual-based models;  
  o hybrid models combining continuum and individual-based models;  
  o stochastic differential equations applied to Mathematical Biology;  
  o parameter sensitivity analysis;  
  o uncertainty quantification techniques such as Bayesian Inference  
▪ Proven ability to produce research of high quality in mathematical biology or closely related discipline.  
▪ Some practical experience of applying the specialist skills and approaches and techniques (e.g. application of numerical techniques, coding, version control of computational code) required for the role.  
▪ Aptitude for working in a multidisciplinary team | ▪ Background knowledge in one or more of:  
  o directed cell migration modelling;  
  o simulations of individual-based or hybrid cell models  
  o biological image processing techniques  
▪ Published papers in relevant academic journals.  
▪ Previous success in gaining support for externally funded research projects.  
▪ Experience of developing new approaches, models, techniques or methods in research area. |
| **Qualifications, certification and training (relevant to role)** | ▪ A PhD, or equivalent in applied mathematics, mathematical biology, biophysics or a closely related branch of mathematics. OR near to completion of a PhD in one of the above disciplines. |
The University strongly endorses Athena SWAN principles, with commitment from all levels of the organisation in furthering women's careers. It is our mission to ensure equal opportunity, best working practices and fair policies for all.
Expectations and behaviours

The University has developed a clear set of core expectations and behaviours that our people should be demonstrating in their work, and as ambassadors of the University’s strategy, vision and values. The following are essential to the role:

Valuing people  
Is always equitable and fair and works with integrity. Proactively looks for ways to develop the team and is comfortable providing clarity by explaining the rationale behind decisions.

Taking ownership  
Is highly self-aware, looking for ways to improve, both taking on board and offering constructive feedback. Inspires others to take accountability for their own areas.

Forward thinking  
Driven to question the status quo and explore new ideas, supporting the team to “lead the way” in terms of know-how and learning.

Professional pride  
Sets the bar high with quality systems and control measures in place. Demands high standards of others identifying and addressing any gaps to enhance the overall performance.

Always inclusive  
Ensures accessibility to the wider community, actively encouraging inclusion and seeking to involve others. Ensures others always consider the wider context when sharing information making full use of networks and connections.
